FLIGHT LIGHT
L-860/L-861 Portable
Elevated Light

Medium Intensity Portable Elevated Lights

To keep airfield traffic running smoothly during repairs, our portable, temporary lights mark the outlines of runways, taxiways and runway threshold and end.

The fixture consists of a clear or colored Fresnel lens (globe) mounted on a yellow powder coated cast aluminum lamp housing. The lamp is secured by an O-ring seal and clamp band. The upper assembly mounts on a 1" EMT extension which is inserted into a junction box, with brackets for sandbag plate sold separately.

The light includes a L830 isolation transformer (L823 primary connector sold separately). The fixture is shipped fully assembled and ready to plug into the series circuit. Optional sandbag plate sold separately (69-618HDPE). Most of the replacement parts are compatible with other manufacturers; consult Flight Light with specific inquiries.

L-860/L-861 Portable Elevated Light

Common Replacement Parts

61-861B	L861-Glass Blue	61-80004	Socket for T10 Lamp (prefocus)
